PREFACE

AUXICAPITALS is an American registered company formed with a motive to make the world earn easy money with us.

The Company's objective is to maximise value to its shareholders through exploration, discovery and development or commercialisation of opportunities in base and precious metals within America. Auxicapitals maintains an active business development program and has a track record of generating shareholder value.

The Company's key asset is the Lachlan Project which covers an extensive strike extent along the Gilmore Suture within the richly mineralised Cobar/Mineral Hill region in Central New South Wales. This region has produced many long-life, high-grade mineral discoveries and has the potential to host a variety of deposit types. AUXICAPITALS believes there is significant potential for the discovery of substantial base metals and gold mineralisation within this land package and has identified a number of areas that show evidence of base and precious metals endowment which have had very little modern systematic exploration completed to date.

AUXICAPITAL entered into a farm-in agreement in August 2019 with privately-owned Lucknow Gold Limited in relation to the Lucknow Gold Project (EL6455) in New South Wales. Lucknow is one of the highest-grade goldfields in the world, with historic production of more than 400,000 ounces at an average estimated mined grade of + 100 g/t Au. AUXICAPITALS intends to undertake a program of geochemical surface sampling and mapping ahead of a drilling program to test for potential down plunge extensions of the high-grade gold ore shoots and repeat structures throughout the project area.

OUR MISSION

.
To be a World Leading gems trading Platform and make the most secured platform for Investors.

.
To be a recognized gold mining company focused on growing sustainable production, delivering on our commitments for excellence and valuing and developing our employees.

To create value for our shareholders, our employees and our business, and social partners by safely and responsibly exploring, mining and marketing our products. Our primary focus is gold, but we will pursue value creating opportunities in other minerals where we can leverage our existing assets, skills and experience to enhance the delivery of value.

Create and grow sustainable value for our stakeholders through the application of best practices in mining and our commitment on protecting the health and well-being of our employees and the environment in the communities where we work.

CEO, AUXICAPITALS.

“To be the most trusted precious metals trading company fulfilling the requirements of our clients while showing complete transparency in all business transactions”

At the heart of Auxicapitals, we look to make profitable but balanced transactions for all our suppliers, traders and investors and to continue to build on our strong foundations.

Why Did We Choose Gold And About Company

Our company is engaged in investing in bullion coins, metal bills.

Such a method of investing is free from the risk of loss of capital, since gold will never depreciate completely, as it happens, for example, with stocks.

However, Auxicapitals is not limited to buying / selling “gold assets” (including gold trading in the Forex market) and is directly involved in the process of their extraction from gold ores in Russia, Uzbekistan, Indonesia and China.

This activity is absolutely profitable due to the stable growth in the price of gold. Established relationships with customers eliminate the likelihood of a lack of distribution channels, which allows us to take full advantage of the high liquidity of this investment object.

ABOUT WORKING WITH GOLD

Gold in the 21st century is not money and not a means of payment. This is a highly liquid, ancient and most reliable means of accumulation. Investing in gold is the most popular way to diversify an investment portfolio, regardless of its size.

There are many reasons for this: gold has historically become a measure of securing money, metal storage does not require special conditions, it is not subject to damage over time, it is not afraid of fire, nor water, nor an open flame.

Legal gold mining consists of several stages of preliminary preparation for the exploration and enrichment of deposits. To increase the efficiency and speed of excavation, special machines and tools are used. The extracted material is processed according to gravity schemes, as well as using flotation and combined processing of mineral raw materials..

AUXICAPITALS team consists of experienced resource executives who have worked for junior and major resource companies and are directed and supported by a Board with a wide range of experience across the resource spectrum and within investment banking.

AUXICAPITALS has a corporate culture focused on maximising the core value of its assets and maintaining focus on value-add exploration activities to optimise the effectiveness and efficiency of the money going into the ground to shorten the time frame to success. We aim to adopt a collaborative approach to build solid relationships and develop mutually beneficial partnerships and opportunities with strong commitment across our team and with stakeholders.

The health and well-being of our people is central to our approach to business and we are committed to ensuring we maintain a safe workplace for our employees and contractors.

AUXICAPITALS aims to comply with all environmental requirements and minimise the impact of its activities in the areas in which it operates; and to engage in an open and collaborative manner with all stakeholder to ensure our activities are in line with the expectations and requirements of the communities in which we operate.

MINERS/GOLD PRODUCERS

AUXICAPITALS can provide Miners and gold producers a full range of services at the mining sites, logistical services for export, along with import and customs clearance within America. Once in America, Auxicapitals can help to have the products assayed, refined or sold onto waiting customers.

AUXICAPITALS can also offer direct financing with cash injections to help expand and grow the operational side of existing mining sites. It has the ability to enter into Joint Venture agreements with miners and gold producers to purchase mined gold. AUXICAPITALS will then be responsible for export. In addition it can provide miners a full turn key product to help with import and customs clearance in America.

WHAT WE OFFER

AUXICAPITALS has large financial investors, and with the teams banking background, these can be harnessed to issue a range of financial instruments to provide miners the safety of guaranteed payments on a CIF basis in America

TRADERS

AUXICAPITALS is the perfect partner for gold traders that do not have the experience or correct licensing setup within America for import and customs clearance.

AUXICAPITALS can provide a full service to traders to starting from the paperwork required to export and import, secure transport of goods, assaying, refining and end user product sales. Traders can use the extensive knowledge of Gold to help with logistical requirements for both export and import procedures.
